

Australian Record For Jaguar XF 2.2 Diesel

by Marc Greig - 25/10/12

It took 10 drivers and a 13,925kms circumnavigation of Australia but the Jaguar XF 2.2 diesel now officially holds the record for the lowest fuel consumption in the 'Under 3.0-Litre Diesel Automatic' category.

The official figure is listed at 3.98l/100kms.

“Jaguar wanted to demonstrate to everyday drivers how they can drive safer, smarter, save fuel, save money and reduce CO2 emissions, as well as break Australian National Fuel Economy Records,” explained Jaguar Australia’s Narine Salmasi.
